PROFILE

Passionate and driven game programmer eager to make a meaningful impact in the video game industry. With a strong passion for games and the entire creative process involved in bringing them to life, I am fueled by the joy of creating immersive experiences for players. With a collaborative mindset and a drive to learn, I strive to contribute to a dynamic team while continuously honing my skills as a game programmer.

SKILLS & ABILITIES

- Skilled in using Unity and C#.
- Familiarity with version control systems like GitHub and Plastic SCM.
- Strong communication skills.
- Actively contribute innovative ideas and insights to the game design process.
- Willingness to stay updated with the latest industry trends.
- Language: Swedish and English.

EDUCATION

University of Skövde, Game Programmer- Bachelor

August 2021 - June 2023

PROJECTS

Studio Downstairs

June 2023 - Current

This was my own game studio that I founded with 4 others. We managed to get into the Incubator in Skövde, but after trial and error we decided to part ways. My role in the company was mainly programming the games since I am the only programmer, but also took on a bit of design and management.

Sarkos

April 2022 - May 2022

A Deck building/ Auto-Battler Game, where you embrace the role of the antagonist, wreaking havoc to combat relentless boredom.

The game was nominated in the *Sweden Game Awards* for multiple categories, including Game of the Year, Best Design, Best Audio, and Best Tech, of which we won the award.
